

Chalice Reader

Page wireframes

A calm, distraction-free library of the UUA WorshipWeb readings, with highlighting, notes and adjustable type. These wireframes are traced from the current Next.js build: every page in /app, its key states, at desktop (1280 px) and phone (390 px) widths.

SITE MAP & NAVIGATION

DESKTOP · 1280

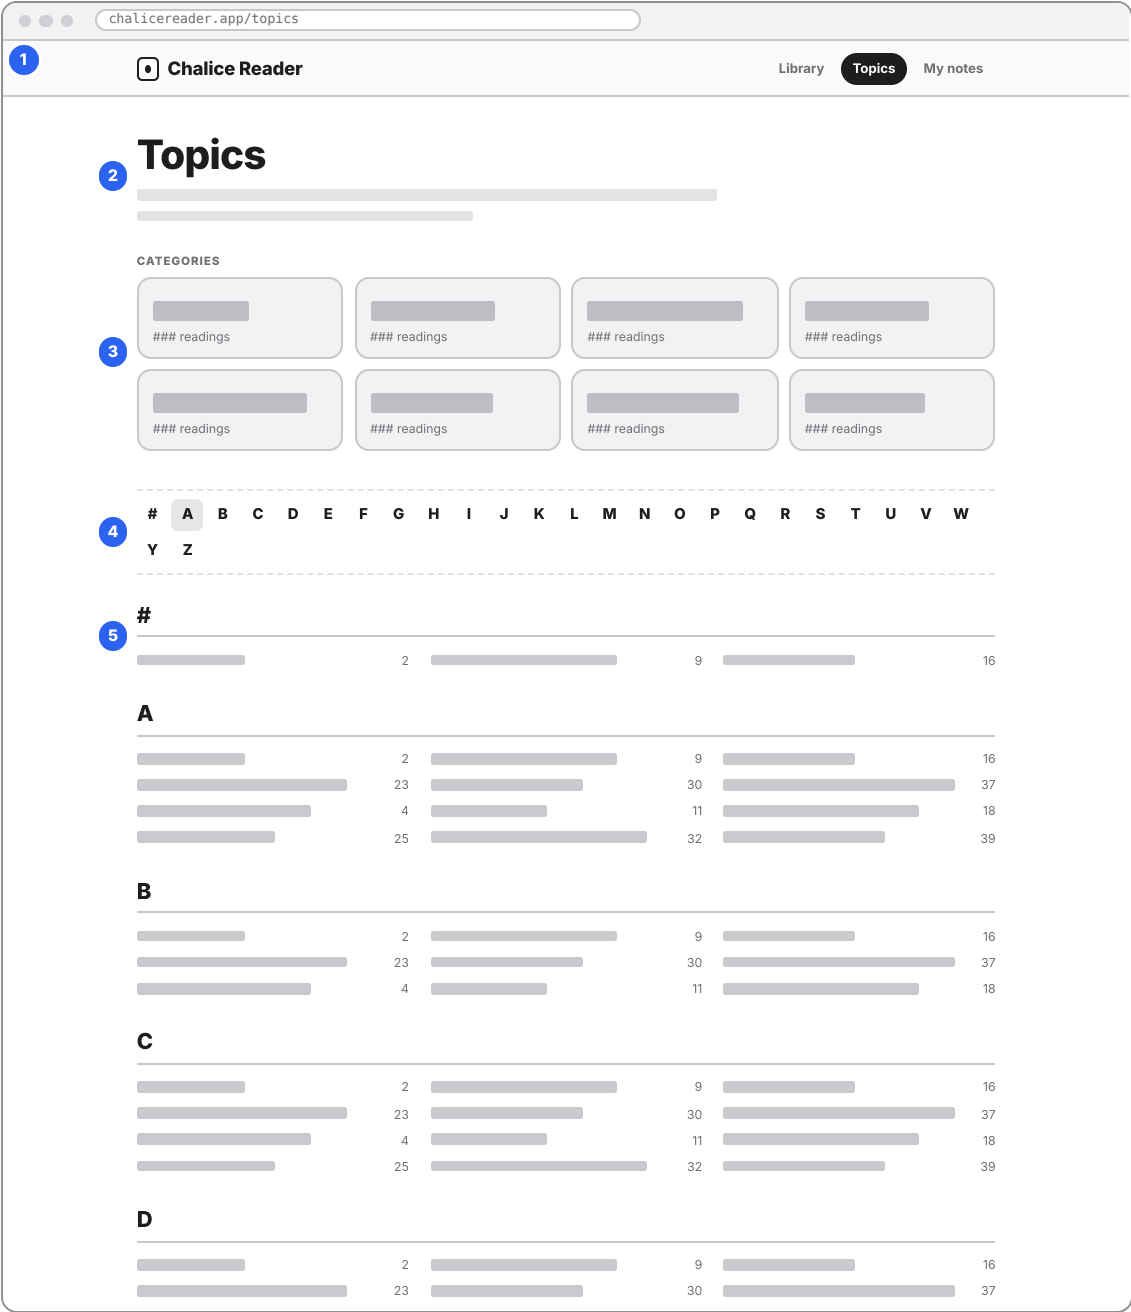

PHONE · 390

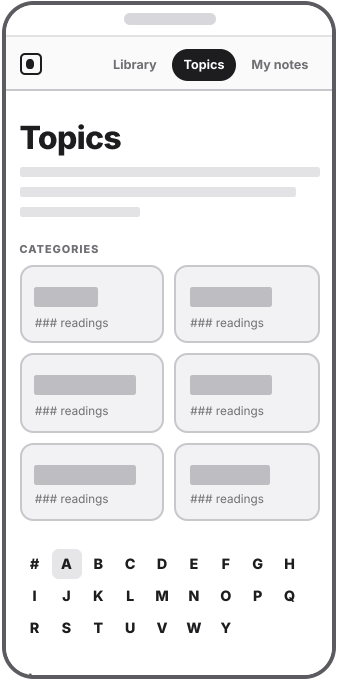

NOTES

- 1 **Site header** — sticky; logo returns home; active page shown as a filled pill.
- 2 **Intro** — headline plus a live count of all readings.
- 3 **Search** — matches title, author, summary and topics; every word must match.
- 4 **Surprise me** — opens a random reading from the current results.
- 5 **Category chips** — one type at a time, with counts; "All" resets.
- 6 **Topic** dropdown, plus a link to the full Topics page.
- 7 **Result count** (announced to screen readers) and **Clear filters** once anything is set.
- 8 **Result card** — type · authors, title, two-line summary → `/read/[slug]`.
- 9 **Show more** — 30 results at a time.
- 10 **Footer** — UUA attribution & student-prototype disclaimer.

Filters write to the URL (`?q= &type= &topic=`) so a search can be bookmarked or shared. On phones the search and button stack.

DESKTOP · 1280

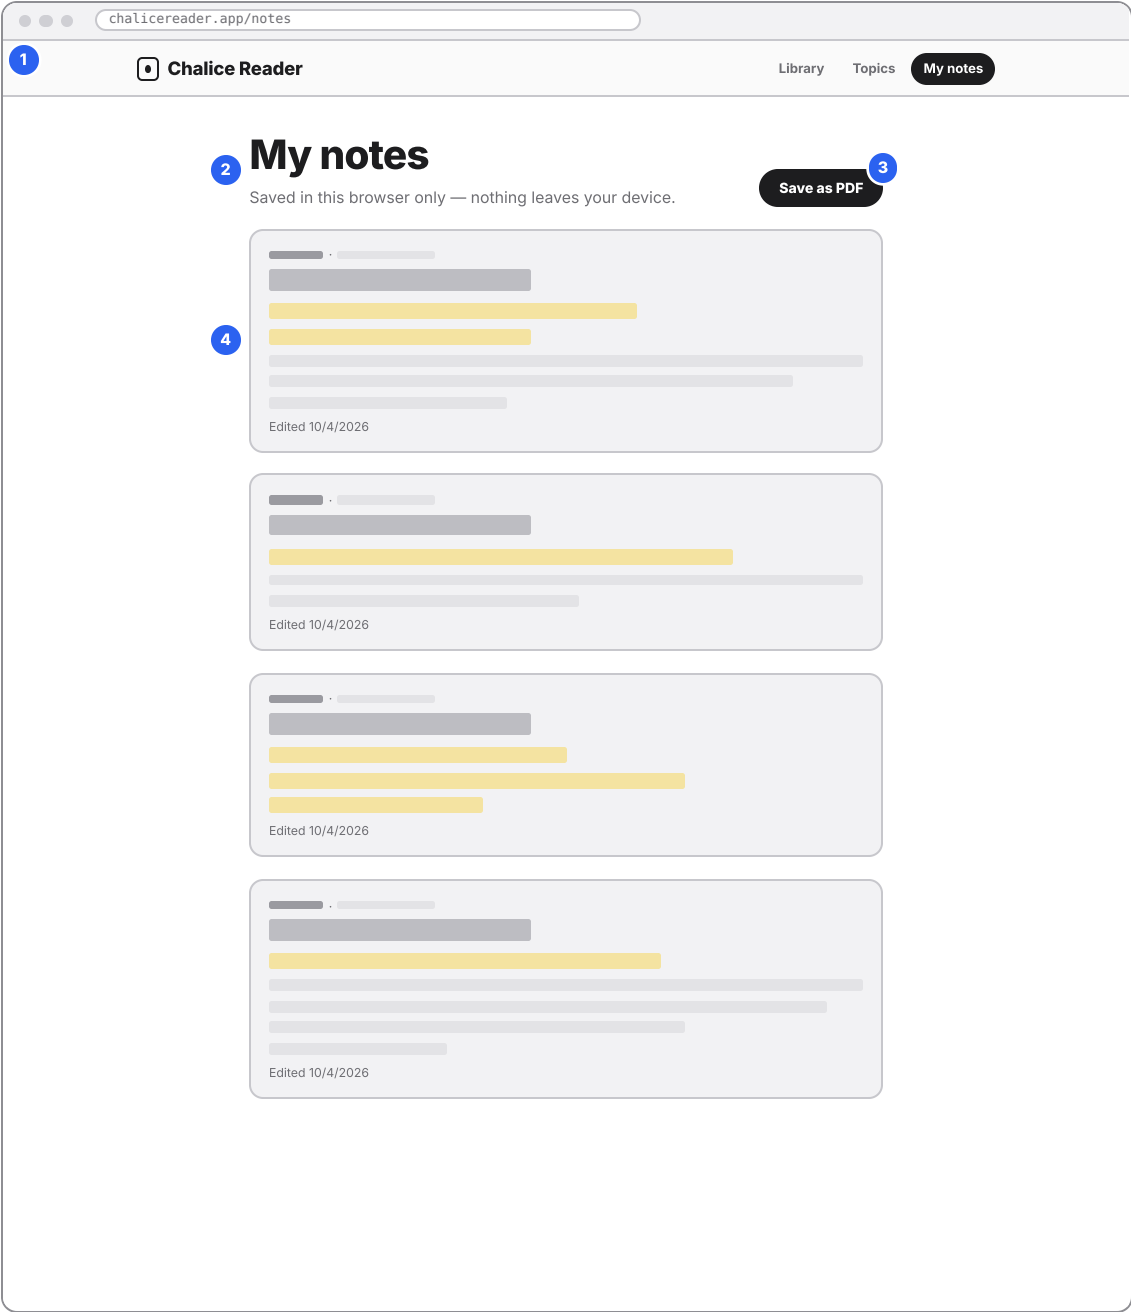

PHONE · 390

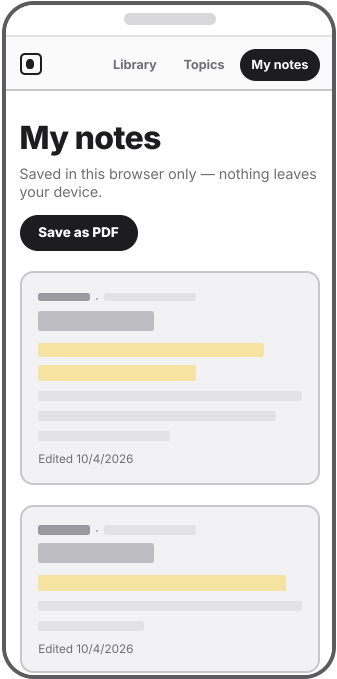

NOTES

- 1 Site header with "Topics" active.
- 2 Page title and one-line explanation.
- 3 Category cards — each type with its count; links to `/?type=...`. 4 columns → 2 on phones.
- 4 A-Z jump bar — sticky under the header while scrolling; only letters that have topics.
- 5 Letter sections — topic name + count; links to `/?topic=...`. 3 columns → 1 on phones.

Numbers-first topics (e.g. "7th Principle") are grouped under "#".

DESKTOP · 1280 — WITH SAVED NOTES

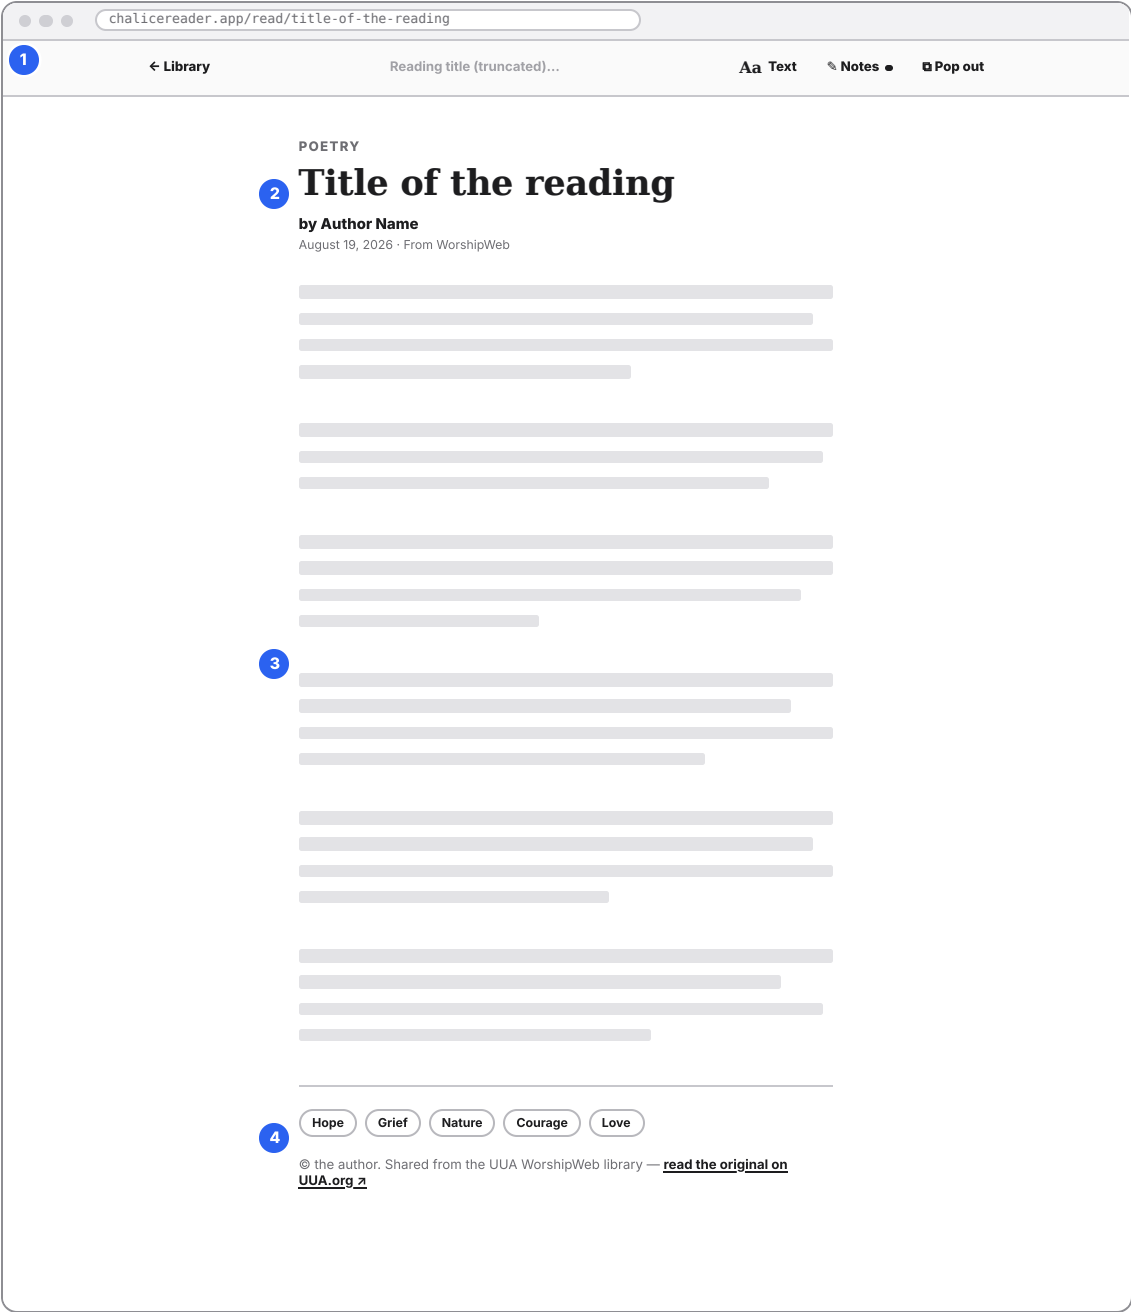

PHONE · 390

NOTES

- 1 Site header with "My notes" active.
- 2 Title + privacy line: everything lives in this browser (localStorage).
- 3 Save as PDF — opens the print dialog; header, footer and buttons are hidden in print.
- 4 Reading card — type · authors, title (→ reading), highlights in their colour, the note text, last-edited date.

Cards are sorted by most recently edited note. Empty state is on sheet 08.

DESKTOP · TOOLBAR SHOWING

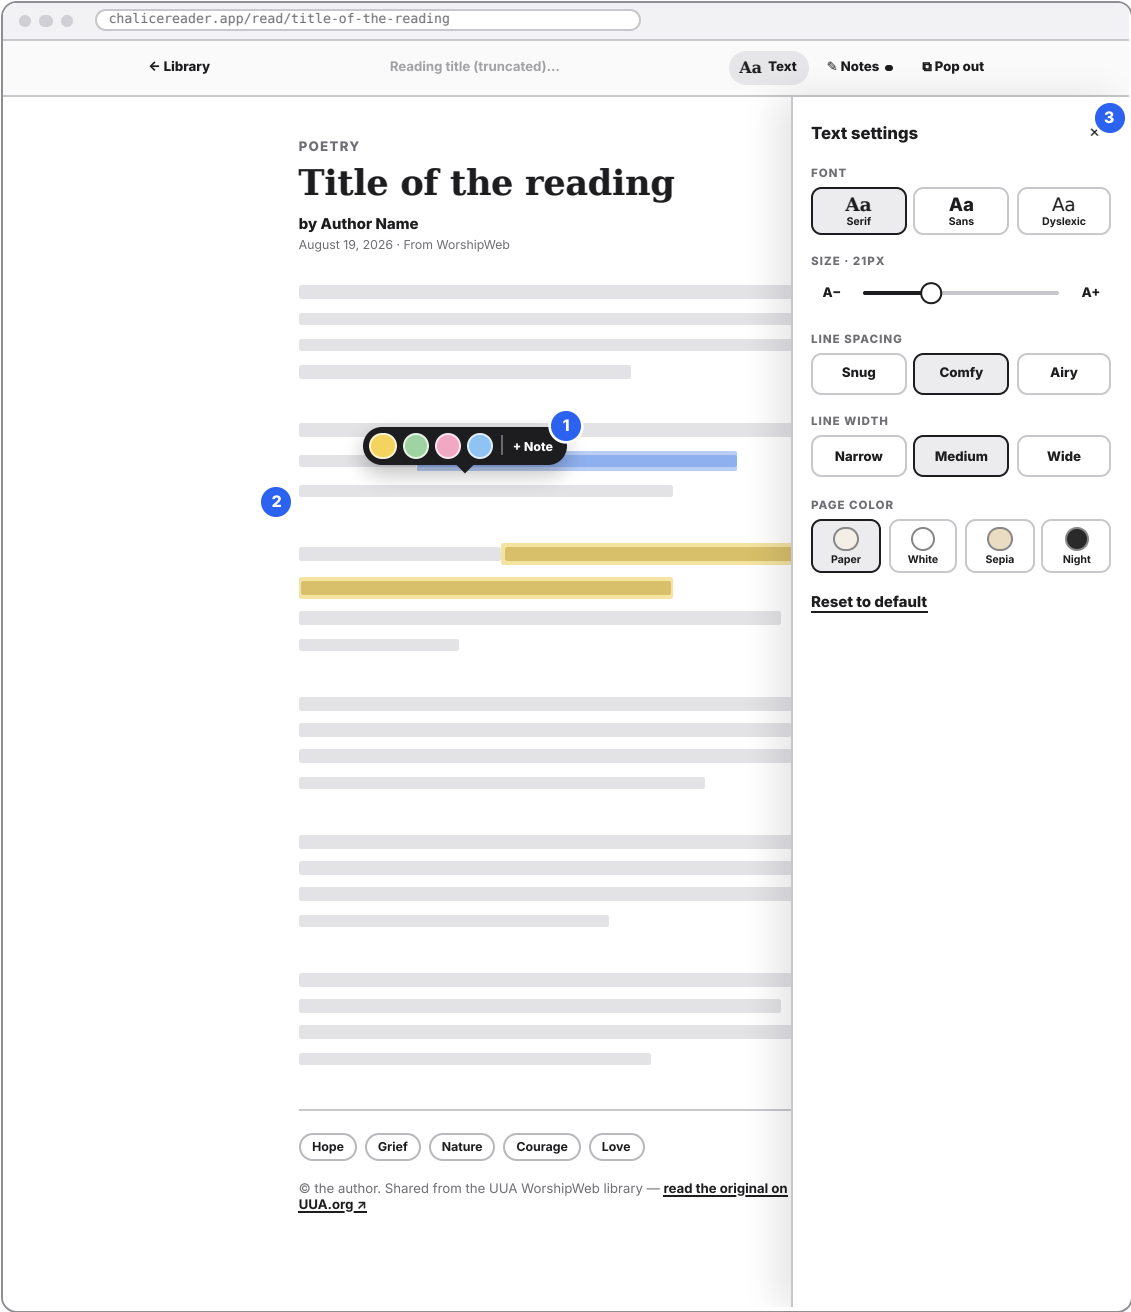

PHONE · TOOLBAR HIDDEN

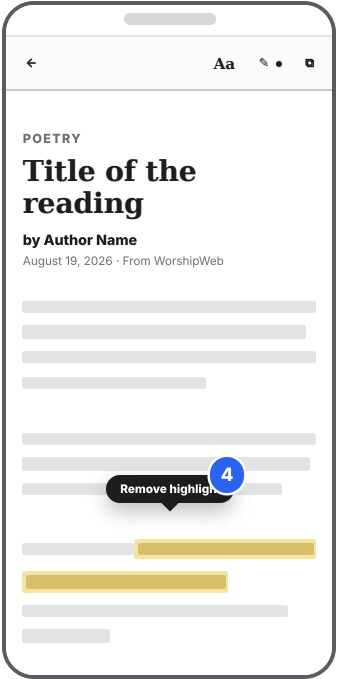

NOTES

- 1 Reader toolbar replaces the site header: ← Library, title, Aa Text, Notes (dot = this reading has notes), Pop out. Labels collapse to icons on phones.
- 2 Reading header — category, title, authors, date · source.
- 3 Reading column — ~608 px measure; font, size, spacing, width and page colour come from Text settings.
- 4 Footer — topic pills (→ Library filtered) and a link to the original on UUA.org.
- 5 Show-tools button — appears when the toolbar has hidden itself (touch screens).

The toolbar slides away 2.5 s after load or when scrolling down; scrolling up, moving the mouse to the top, or Esc brings it back. Pop-out opens the same page in a 760×920 window with × Close instead of ← Library.

DESKTOP · TEXT SELECTED + TEXT SETTINGS OPEN

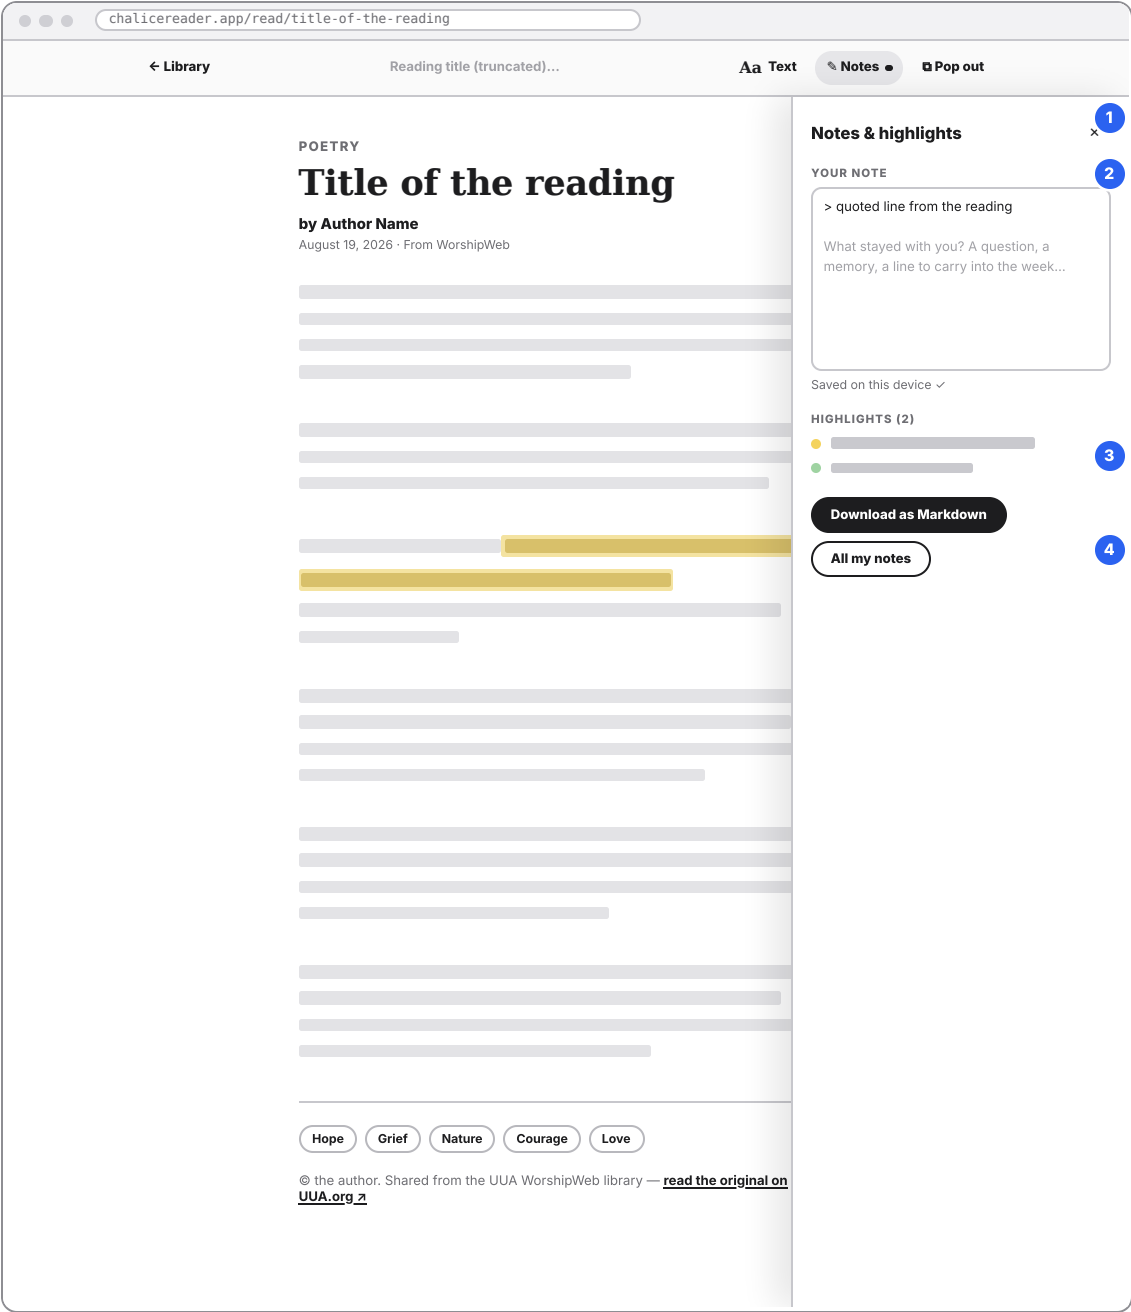

PHONE · TAPPING A HIGHLIGHT

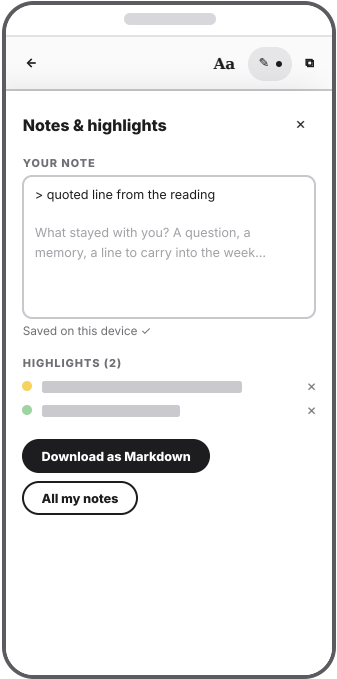

NOTES

- 1 **Highlighter popover** — appears above any selected text: 4 colours (yellow, green, pink, blue) or **+ Note** to quote it into the notes panel.
- 2 **Saved highlight** — painted back onto the text every visit; overlapping highlights are replaced.
- 3 **Text settings panel** (384 px, right side) — font Serif / Sans / Dyslexic, size 14–34 px, line spacing, line width, page colour (Paper, White, Sepia, Night), reset.
- 4 **Remove highlight** — tapping an existing highlight offers to delete it.

Settings are remembered on this device and apply to every reading.
Popovers close on scroll or Esc.

DESKTOP · NOTES PANEL OPEN

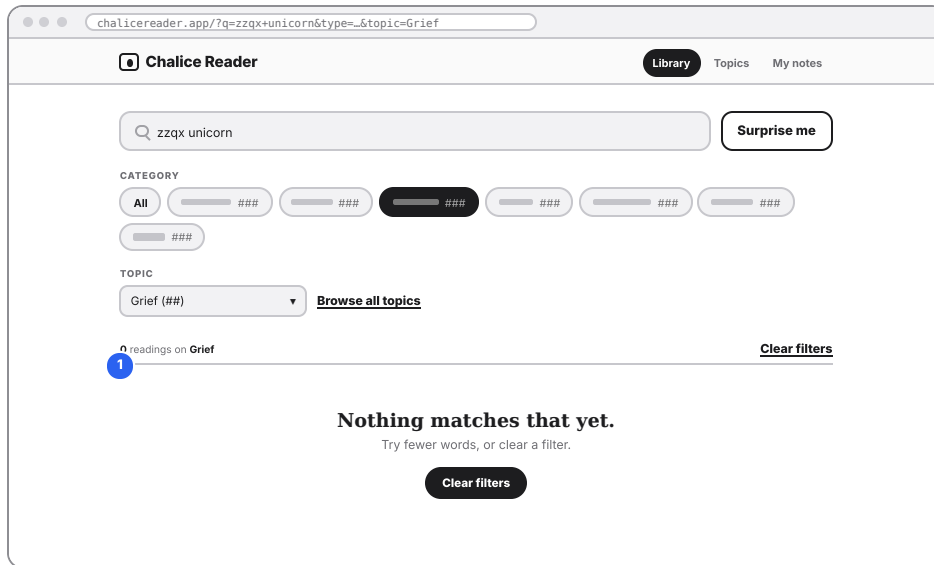

PHONE · PANEL GOES FULL WIDTH

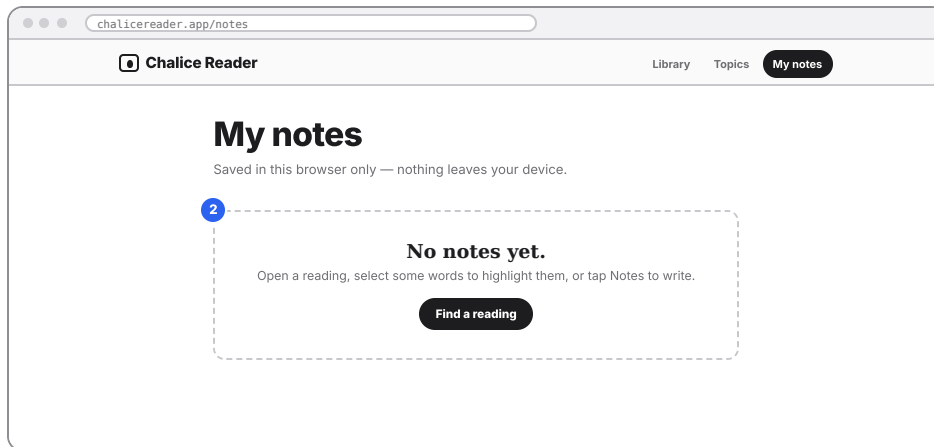

NOTES

- 1 **Panel header** — “Notes & highlights” with × (Esc also closes).
- 2 **Your note** — free-text area; quotes added via “+ Note” arrive as > quote . Autosaves half a second after typing stops.
- 3 **Highlights list** — colour dot + quote; click to scroll to it in the text, × to remove.
- 4 **Actions** — **Download as Markdown** (title, highlights, note, source link) and **All my notes** → /notes .

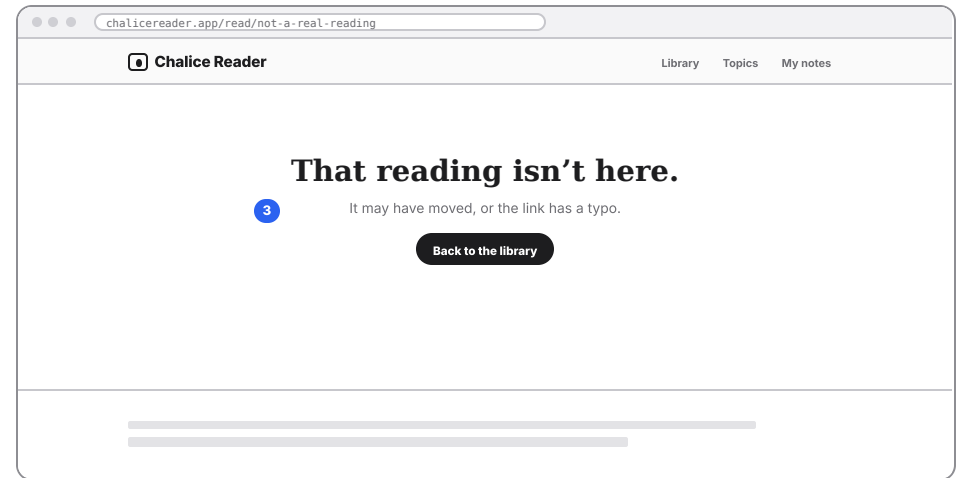

While a panel is open the toolbar stays visible. On phones the panel covers the full width under the toolbar.

LIBRARY · NO RESULTS

MY NOTES · NOTHING SAVED YET

NOT FOUND (404)

NOTES

- 1 No results** — shown when search + filters match nothing; one button clears all three filters.
- 2 No notes yet** — dashed placeholder explaining how to highlight or write, with a way back to the library.
- 3 404** — any unknown `/read/...` slug or route; site header + one clear way home.
